**RD-MONOGUARD SG**

**Semi-Gloss**

**DESCRIPTION OF THE PRODUCT**

**USE:**

Fast drying Primer/Finish high performance anti-corrosion coating with universal adherence.

**FEATURES:**

Single component water-based coating based on a special blend of innovative resins for the protection of metal surfaces, objects and engineered structures against corrosion and weathering. **RD-Monoguard** is a DTM (Direct-To-Metal) type of coating that can be applied directly to various type of ferrous and non-ferrous metals. Its special formulation and ingredients offer incredible durability when it comes to protecting steel against corrosion, even without priorly blasting the surface.

**RD-Monoguard** is water-based, easy to handle, safe and has no fire risks. It is a fast-drying coating system that greatly reduces downtime during installation and increases on-site labour productivity.

Virtually odour free, it does not affect neighbouring occupants and can therefore be used in occupied buildings.

**RD-Monoguard** is UV resistant and its film forms a neat and tidy enamel type of finish. Tested to be used in the most severe environments, **RD-Monoguard** protects valuable assets worldwide 24/7 including bridges, tanks, etc.

**RD-Monoguard** is part of the SCS – Single Coating System - product group.

**SUBSTRATES:**

Steel, new and old galvanized steel, stainless steel, aluminium, copper, ...

Risks of chemical spills or graffiti:
The system can be top coated by one or two coats of RD-Hydrograff HP Clear High Gloss if not already used in the system.

*Indicated consumption is theoretical and does not consider potential losses during application. It can also be influenced by the porosity of the substrate.*

### APPLICATION INSTRUCTIONS

**APPLICATION CONDITIONS:**
- Ambient temperature: minimum 5°C (41°F) - Optimal between 12°C and 25°C (54°F and 77°F).
- Relative humidity: maximum 80 %
- Surface temperature must be minimum 3°C (5°F) above dew point.

**APPLICATION MEANS:**
- Brush, roller or airless (nozzle size: 010-012)
- Application by airless is recommended and makes it easier to reach the recommended thicknesses. Use a device that allows a minimum pressure of 70-150 bar / 1000 - 2000 psi at the outlet.

**PREPARATION OF THE SUBSTRATE:**
- The substrate must be clean: dry, degreased and dust free. Non adhering elements such as older coatings or rust must be removed. Different type of surface preparation are possible:
  1. Remove rust manually or by power tool to ST2 – ISO 8501-1/SSPC SP2 or SP3.
  3. High pressure washing following SSPC SP12 WJ4.
- Contact your RD Coatings representative in case of hesitation.

**DILUTION:**
- Product is ready-for-use. Dilute with maximum 3% water when applying by airless or in warm weather conditions (> 25°C / > 77°F).

**DRYING TIME:**
- Touch dry: +/- 1 hour depending on thickness
- Recoatable: +/- 2 hours depending on film thickness
- Possible to apply wet on wet in special conditions.

**CLEANING OF TOOLS:**
- Water.

**SPECIFICITIES:**
- Mix well before use.

### TECHNICAL DATA

**FINISH:**
- Semi-Gloss +/- 70 % +/- 5 (Gardner 60°)

**COLOURS:**
- Stock colours: White. Also available in clear, check RD-Monoguard Clear.
- RAL, NCS and bespoke colours. Available on RD Coatings dispensing system.

**DENSITY:**
- Ca. 1,15 +/- 0.05 g/cm³

**SOLIDS CONTENT:**
- In weight: 51 % +/- 2 (for white)
- In volume: 43 % +/- 2 (for white)

**VISCOSITY:**
- 30 - 50 P (Brookfield 20RPM)
VOC CONTENT: < 45 g/L
FLASH POINT: Not flammable.
STORAGE STABILITY: 12 months: keep away from heat and frost
PACKAGING: 1 L – 5 L – 10 L – 20 L
