DESCRIPTION OF THE PRODUCT

USE:
Universal adhesion primer for non-ferrous and smooth surfaces.

FEATURES:
Single component water-based primer based on acrylic resins used for the priming of difficult surfaces to ensure a better adhesion of the subsequent coating system.

RD-Multiprim is water-based, easy to handle, safe and has no fire risks. It is a fast-drying coating system that greatly reduces downtime during installation. Virtually odor free, it does not affect neighboring occupants and can therefore be used in occupied buildings.

RD-Multiprim offers little resistance against corrosion and it is advised mainly for non-ferrous substrates. Should corrosion resistance be required, RD-Monoguard or RD-Elastometal will be an excellent choice.

RD-Multiprim can be overcoated with no limitation in time by any water-based coating from the RD Coatings range. Even if it is UV resistant, we recommend overcoating it for better resistance to weathering.

SUBSTRATES: Galvanized steel, aluminium, stainless steel, glass, zinc, hard PVC, polished concrete, ceramics, ...

</tbody>
</table>

Indicated consumption is theoretical and does not consider potential losses during application. It can also be influenced by the porosity of the substrate.
APPLICATION INSTRUCTIONS

APPLICATION CONDITIONS:
- Ambient temperature: minimum 5° C (41°F)
- Optimal between 12° and 25°C (54° and 77°F).
- Relative humidity: maximum 80 %
- Surface temperature must be minimum 3°C (5°F) above dew point.
- Concrete screed may not contain more than 5% of humidity.

APPLICATION MEANS:
- Brush, roller or airless (nozzle size: 011–15)

PREPARATION OF THE SUBSTRATE:
- RD-Multiprim has an excellent adhesion on many kinds of surfaces and does not need any specific surface preparation other than having a clean and dry surface.
- Scratching some difficult type of surfaces with sandpaper type 180 will help to increase the adherence.

In case of new polished concrete floors, the curing compound should be removed first by means of a curing remover (30% solution of hydrogen chloride) or mechanically.

DILUTION:
- Product is ready-for-use.

DRYING TIME:
- Touch dry: +/- 1 hour
- Recoatable: +/- 4 hours – No maximum recoating window.

CLEANING OF TOOLS:
- Water.

SPECIFICITIES:
- Mix well before use.

TECHNICAL DATA

FINISH:
- Satin +/- 15 % +/- 5 (Gardner 60°)

COLORS:
- Stock colors: White.
- RAL, NCS and bespoke colors.
- Available on RD Coatings dispensing system.

DENSITY:
- Ca. 1,3 +/- 0,05 g/cm³

SOLIDS CONTENT:
- In weight: 54 % +/- 2 (for white)
- In volume: 40 % +/- 2 (for white)

VISCOSITY:
- 20 - 30 P (Brookfield 20RPM)

VOC CONTENT:
- < 40 g/L

FLASH POINT:
- Not flammable.

STORAGE STABILITY:
- 12 months: keep away from heat and frost

PACKAGING:
- 1 L – 2,5 L – 5 L
